

INDUSTRY FIRST

AmpChampTM RGB and RGBW

ALLOY LED[®]

Revolutionary Design and Performance

Alloy LED AmpChamp connectors are UL Recognized - the only LED tape light terminal connectors in the industry to carry this distinction. Providing the safest, most reliable, and most secure connections, the AmpChamp line-up now includes the industry's first RGB and RGBW terminal connectors.

The new AmpChamp patent-pending design accommodates tape light as narrow as .40 in. (10mm) for a much wider range of color-changing applications, while the high copper content construction provides exceptional corrosion resistance and unmatched connectivity.

Alloy LED manufactures an AmpChamp connector for every LED tape light it offers, providing the most complete solution for the longest-lasting lighting installations. Best of all, AmpChamp connectors are backed by a lifetime warranty when used with Alloy LED tape lights.

AmpChamp Customer Advantages

We've developed AmpChamp with our customers in mind!

- Compatible with Radialux RGB and RGBW tape lights
- High amp limit enables longer runs
- Compatible with solid core, tinned and stranded wire
- Includes a pre-attached six-inch lead of 20 AWG, CL2 in-wall rated wire with tinned leads
